

Attachments for Toyota Forklift

Toyota Forklift Attachments - In the U.S., Toyota Materials Handling inc., or TMHU, has been the best selling lift truck provider since 1992. Proudly celebrating more than 40 years of performance, the Irvine, California established company presents an extensive line of quality lift vehicles. Resulting from their history of excellence, reliability, and resilience, Toyota remains prevalent in this competitive market. Quality is the cornerstone of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S. are built here.

All Toyota machines and components built within North America adhere to the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to persistent improvement, and its environmental methods. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift vehicles emit 70 percent fewer smog forming emissions than the current centralized EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

The head of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's success comes from its dedication to create high quality lift trucks at the same time as offering outstanding client support and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, also known as TICO, is listed in Fortune Magazine as the world's principal lift truck supplier and is amongst the magazines impressive World's Most Admired Companies.

Redefining Environmental Accountability

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not many other organizations and no other lift truck manufacturer can equal Toyota's history of caring for the natural environment while simultaneously encouraging the economy. Environmental responsibility is an important aspect of corporate decision making at Toyota and they are proud to be the first and only manufacturer to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift vehicles. Yet an added reason they remain a leader within the industry.

In 2006, Toyota introduced the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission principles, and also meets California's more intricate 2010 emission standards. The end product is a lift truck that creates 70 percent fewer smog forming emissions than the present Federal standards allow.

Furthermore in 2006, Toyota developed an affiliation with the Arbor Day Foundation, furthering their dedication to the environment. In excess of 57,000 trees have been planted in regional parks and national forests damaged by environmental causes such as fires, as a result of this partnership. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's system of dealers to non-profit organizations and local consumers to help sustain communities all over the United States

Industry-Leading Safety

Toyota's lift vehicles offer enhanced productivity, visibility, ergonomics and durability, and most notably, the industry's leading safety technology. The company's System of Active Stability, also called "SAS"•, helps decrease the risk of accidents and injuries, and increasing productivity levels while minimizing the likelihood of merchandise and equipment breakage.

System Active Stability can discern situations that could lead to lateral volatility and possible lateral overturn. When any of these conditions have been detected, the SAS will instantaneously engage the Swing Lock Cylinder to re-stabilize the rear axle. This changes the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also helps to prevent injuries or accidents while adding strength.

SAS was originally launched to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Ever since then, SAS continues to be built-in to the majority of Toyota's internal combustion models. It is standard gear on the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with mandatory worker instruction, overturn fatalities across all brands have decreased by 13.6% since 1999. Additionally, there has been an overall 35.5% decrease in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's standard of brilliance reaches far beyond its technological achievements. The company maintains an extensive Operator Safety Training course to help consumers meet OSHA standard 1910.178. Training services, video tutorials and various materials, covering a wide scope of matters-from individual safety, to OSHA regulations, to surface and cargo situations, are accessible through the vendor network.

Toyota's U.S. Commitment

Toyota has sustained a permanent existence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, created its 350,000th lift truck. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in

America now are manufactured in the United States.

Based in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities across 126 acres. Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service parts, with the total commitment exceeding \$113 million dollars.

The modern NCC was designed to operate for TMHU buyers and dealers. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its originator, Sakichi Toyoda, in 1867, and lastly a instruction center.

Leader in Client Service and Satisfaction

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations all through the United States, offering the most comprehensive and inclusive consumer support and customer service in the industry. The company's new and Certified Used lift vehicles, service, parts, and financing capabilities make Toyota dealerships a one-stop shop to guarantee overall client satisfaction.
