

Electrical Part for Forklifts

Forklift Electrical Parts - Lift trucks can be purposely labeled to be used in hazardous sites. A labeled forklift denotes the design has met the least standards of ANSI/UL 558 utilized for engine powered forklifts or ANSI/UL 583 intended for electric lift trucks for the type of label placed.

The use for labels utilized for lift forklifts can be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Areas of Use, Maintenance and Operation, and Type Designations. Check with your local insurance carrier and Fire Marshall for more info concerning the approved uses of industrial powered trucks in your application.

If the particular lift truck meets the outlined standards, labels could be put. A labeled forklift will show the type of designation put on the nameplate and would have a properly corresponding label put.
