

Aerial Work Platform

Aerial Work Platforms - There are many attachments meant for forklifts that could be used to be able to help expand the capabilities of your lift truck and allow you to carry stuff, handle materials with less effort or to complete clean-up tasks.

A few accessories were specifically intended for the forks themselves. For instance, blade extensions could be utilized when you need a lot more fork length, which increases lifting capacity. Fork extensions come in lengths varying from 48-120 inches. Rounded or triangular accessories are another type utilized when transferring rolled material in order to ensure it does not roll off of the typical flat blades.

Lifting attachments could be pivoting and telescoping crane accessories. They come in numerous kinds. These accessories are normally designed for moving poles, lumber, metal bars or whatever kind of bulky things. Other accessories like for example different kinds of hooks and hook plates are offered to be able to carry items utilizing a sling or chain. Slab lifters and magnetic filters are other items which can be utilized along with hook attachments. Slab lifters are specialized accessories which are used for carrying various materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools that attach to your lift truck in order to make transferring rolls of carpet much easier. The attachment connects onto the lift truck's blades and has a pole which goes through the center of the carpet roll.

There are several different types of lift truck attachments that can be intended for facility maintenance such as snow forks. These blades attach to front end loaders and could transfer materials like for instance snow, dirt and soil. Other common cleanup attachments consist of magnetic sweepers and standard sweepers. Standard sweepers includes a broom that the forklift blades connect onto for sweeping large spaces like factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in areas where there is lots of metal debris such as on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up fast and simple.

Material spreaders are other accessories used on forklifts. These spreaders are handy for a variety of applications like spreading seeds, ice melt, rock salt, pellets, fertilizers and insecticides.

Work platforms are another optional lifting accessory which numerous companies use day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are some models existing which are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location using the forklift. Larger platform units have added space for personnel in order to carry tools and other necessary stuff meant for the task. Often work platforms are constructed of poly material or steel.
